RE: Now or Never PAC (the "Committee")

Dear Mr. Morse:

We are in receipt of your letters dated November 9, 2012 and November 21, 2012 which identified two issues with the respect to the October Quarterly Report and the 12 Day Pre-General Report for the Committee. This letter is our response to those issues.

The first issue is that Schedule E of the October Quarterly Report for the Committee shows a Calendar Year-To-Date Per Election for Office Sought total for Missouri Senate to be \$0.00 and Illinois 8th Congressional District to be \$0.00 and Schedule E of the 12 Day Pre-General Report for the Committee discloses the Calendar Year-to-Date Per Election for Office Sought total for the Illinois 8th Congressional District to be \$510,544.50. (I have had a similar problem with another committee.) I have again sat down with my assistant (She actually does the initial data entry.) and tried to determine what is causing this. She informs me that when she prepares the 24 Hour/48 Hour Independent Expenditure Report, your software is automatically picking up the cumulative amount expended and she does not actually have the ability to manipulate the cumulative amount. Our 24 Hour/48 Hour Independent Expenditure Reports appear to be correctly picking up the cumulative amounts. When my assistant drafts a regular report, such as a Quarterly Report or a Pre-Election Report, the data from the Independent Expenditure Reports is automatically pulled into the regular report and she has no ability to manipulate this information. So, while we would again be glad to fix this error, we are unable to determine how our data entry is the problem.

We fully understand the need for these issues to be correctly reflected on the October Quarterly Report and the Pre-General Report. We stand ready to make adjustments to the data
